ONE HUNDRED AND FORTY-FIFTH
ANNUAL COMMENCEMENT

6 P.M., FRIDAY, JUNE 20, 2003

RYAN FIELD
EVANSTON, ILLINOIS

UNIVERSITY SEAL AND MOTTO

Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words *Northwestern University, Evanston, Illinois*.

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern's original faculty,

redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of Saint John, chapter 1, verse 14, translating to *The Word . . . full of grace and truth*. Circling the book are the first three words, in Latin, of the University motto: *Quaecumque sunt vera* (Whatsoever things are true). The outer border of the seal carries the name of the

University and the date of its founding. This seal, which remains Northwestern's official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

NORTHWESTERN UNIVERSITY

*Whatsoever things are true,
whatsoever things are honest,
whatsoever things are just,
whatsoever things are pure,
whatsoever things are lovely,
whatsoever things are of good report;
if there be any virtue,
and if there be any praise,
think on these things.*

To our guests

Commencement is the highlight of the academic year. It is that significant occasion, both solemn and joyful, when we honor those students who have completed their course of study. Commencement is important to all of you, the University, and its faculty, staff, and students. To enhance the dignity of the event, you are respectfully requested to avoid unnecessary conversation and moving about during the ceremony.

Please silence all cell phones and pagers. Guests are not permitted on the field at any time.

Smoking is not permitted in Ryan Field or McGaw Memorial Hall.

HENRY S. BIENEN

President

Henry S. Bienen was elected the 15th president of Northwestern University on June 13, 1994. He took office on January 1, 1995.

Mr. Bienen came to Northwestern from Princeton University, where he had served as the James S. McDonnell Distinguished University Professor since 1985 and dean of the Woodrow Wilson School of Public and International Affairs since 1992. A political scientist specializing in modern Africa, he has pursued interests in political and economic development, comparative politics, civil-military relations, and U.S. foreign policy.

Mr. Bienen began his association with Princeton in 1966 as assistant professor of politics and international affairs and was named associate professor in 1969, professor in 1972, and William Stewart Tod Professor of Politics and International Affairs in 1981.

At Princeton Mr. Bienen also served as chair of the Department of Politics (1973–76), director of the African Studies Program (1977–78, 1983–84), director of the Research Program in Development Studies at the Woodrow Wilson School of Public and International Affairs (1979–82), and director of the Center for International Studies (1985–92).

Recipient of two Rockefeller Foundation grants (1968–69, 1972–73) and a Rockefeller Foundation Fellowship for Summer Study (1979), Mr. Bienen was a fellow at the Center for Advanced Studies in Behavioral Sciences at Stanford University (1976–77), a Polsky Fellow

at the Aspen Institute (1982–83), a member of the Institute for Advanced Studies at Princeton (1984–85), and a Seeger Fellow at the Council on Hellenic Studies at Princeton (1989).

Mr. Bienen has served as a consultant to the U.S. Department of State, National Security Council, Agency for International Development, Central Intelligence Agency, and World Bank as well as the Ford, Rockefeller, and John D. and Catherine T. MacArthur Foundations. A member of the Council on Foreign Relations, he was recently elected to its board of directors. He also serves on the board of directors of the Chicago Council on Foreign Relations, the Shedd Aquarium, Steppenwolf Theatre, the Alain Locke Charter Academy, and Combined Specialty Groups, Inc.

Author, coauthor, or editor of 17 books, Mr. Bienen has also written numerous book chapters and articles. He was the editor of *World Politics* (1973–74, 1984–91) and has served on a number of editorial boards.

Mr. Bienen received a bachelor's degree with honors in 1960 from Cornell University and a master's degree in 1961 from the University of Chicago, where he was awarded a PhD in 1966.

PATRICK G. RYAN

Chair, Board of Trustees

Patrick G. Ryan is chairman and chief executive officer of Aon Corporation, a global leader in risk management, insurance and reinsurance brokerage, and human capital consulting and outsourcing, with 53,000 employees in more than 500 offices located in more than 120 countries. Mr. Ryan started as an entrepreneur and merged his company to form what ultimately became Aon.

Mr. Ryan is chair of the Board of Trustees of Northwestern University and a director of the Tribune Company. He also serves as a trustee of Rush-Presbyterian-St. Luke's Medical Center.

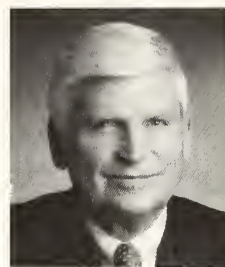

One of Chicago's most visible business and civic leaders, Mr. Ryan was recently named the 2002 International Executive of the Year by Brigham Young University and was the 2002 recipient of the Golden Plate Award from the Academy of Achievement in Ireland. He has also received the Horatio Alger Association of Distinguished Americans Award.

His numerous other tributes include 2001 Man of the Year, the Greater Chicago Chapter of the Juvenile Diabetes Research Foundation; 1997 Executive of the Year Award, *Crain's Chicago Business*; Insurance Leader of the Year, College of Insurance; the Order of Lincoln Medallion, Illinois's highest award, recognizing a lifetime of accomplishment; the Business Statesman Award, Harvard Business School Club of Chicago; the Distinguished Leadership Award, Chicagoland Chamber of Commerce; the Chicago Historical Society's Marshall Field History Maker Award for

Distinction in Corporate Leadership and Innovation; the Distinguished Citizen Award, Chicago Area Council of Boy Scouts of America; the President's Medal, Loyola Academy; 1999 Free Enterprise Award, the Insurance Federation of New York; and the Distinguished American Award, Chicago chapter of National Football Foundation and College Hall of Fame. Mr. Ryan is also a member of the Chicago Business Hall of Fame and a member and past president of the Economic Club of Chicago.

Mr. Ryan and his wife, Shirley, were awarded the 1998 Distinguished Philanthropist Award. They founded and are active in the Pathways Center for Children and the Pathways Awareness Foundation, dedicated to serving the needs and interests of children and young people with physical-movement difficulties.

Mr. Ryan received a bachelor's degree in business from Northwestern in 1959.

HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine devout Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine men resolved on May 31, 1850, to establish an institution of “the highest order of excellence” to serve the people of the original Northwest Territory as established by the Northwest Ordinance of 1787 (Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota). The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

Only one of the founders, physician John Evans, was a college graduate. The quintessential renaissance man, he built railroads, founded both the Illinois Medical Society and the Illinois Republican Party, and was a confidante of Abraham Lincoln, who appointed him governor of the Colorado Territory. Evans guided Northwestern during its critical early years, chairing the Board of Trustees from the time of the University’s founding in 1851 until his death in 1897. The town that grew up around Northwestern was named Evanston in his honor.

Northwestern grew and prospered under Evans’s stewardship. In 1853 the University bought and began to develop 379 acres of lakeshore farmland. By 1855 the University had completed its first building and opened a College of Liberal Arts comprised of two faculty members and ten male students. By 1869 Northwestern had admitted its first female students; four years later, it negotiated a merger with the Evanston College for Ladies, whose president, eminent suffragette and temperance movement leader Frances E. Willard, became Northwestern’s first dean of women.

At the turn of the century Northwestern consisted not only of a liberal arts college but also six undergraduate and graduate professional schools, including the schools of law and medicine in Chicago. With the establishment of the Graduate School in 1910, Northwestern adopted the German university model of providing graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago; it has more than 2,000 full-time faculty, more than 13,000 full-time students, and an annual budget exceeding \$1 billion. Northwestern’s vision of excellence — although faithful to its founding — invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and highly selective student body drawn from across the nation and around the world.

SCHOOLS OF THE UNIVERSITY

The **Judd A. and Marjorie Weinberg College of Arts and Sciences**, established in 1851 as the College of Liberal Arts, offers the degree of bachelor of arts. Through the School of Continuing Studies, the Weinberg College of Arts and Sciences also offers the degrees of bachelor of philosophy and bachelor of science in general studies.

The **School of Communication**, established in 1878 as the School of Oratory and later renamed the School of Speech, offers the degrees of bachelor of science in communication and master of science in communication. Through the School of Continuing Studies, the School of Communication also offers the degree of bachelor of philosophy in communication.

The **School of Continuing Studies**, established in 1933 as University College, offers courses leading to the degrees of bachelor of philosophy and bachelor of science in general studies, conferred by the Weinberg College of Arts and Sciences; the degree of bachelor of philosophy in communication, conferred by the School of Communication; and the degrees of master of arts in liberal studies and master of literature, conferred by the Graduate School.

The **School of Education and Social Policy**, established in 1926 as the School of Education, offers the degrees of bachelor of science in education and social policy and master of science in education and social policy.

The **Robert R. McCormick School of Engineering and Applied Science**, established in 1909 as the College of Engineering, offers the bachelor of science degree. The McCormick School also offers master's degrees in engineering management, information technology, manufacturing engineering, and project management.

The **Graduate School**, established in 1910, administers all advanced programs leading to the degrees of doctor of philosophy, master of arts, master of fine arts, master of public health, and master of science.

The **Medill School of Journalism**, established in 1921 and named in honor of pioneering Chicago journalist Joseph Medill, offers the degree of bachelor of science in journalism as well as master of science degrees in journalism and integrated marketing communications.

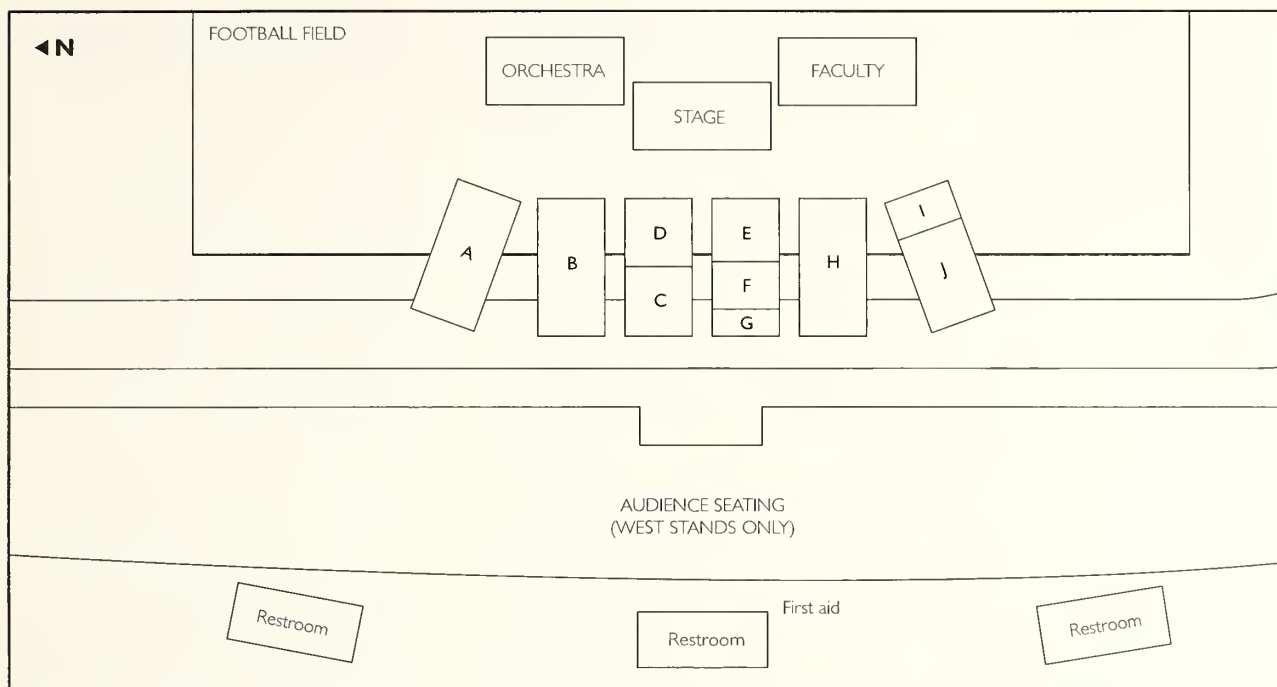

The **School of Law**, established in 1859, offers the degrees of juris doctor, master of laws, master of laws in taxation, and doctor of juridical science.

The **J. L. Kellogg School of Management**, established in 1908 as the School of Commerce, offers the master of business administration degree. In addition to the full-time program, Kellogg also offers the evening Managers' Program on the Chicago campus, the weekend Executive Master's Program on the Evanston campus, and the International Executive Master's Program in Germany, Hong Kong, and Israel.

The **Feinberg School of Medicine**, established in 1859 as the Medical School, offers the degrees of doctor of medicine, doctor of physical therapy, and master of physical therapy.

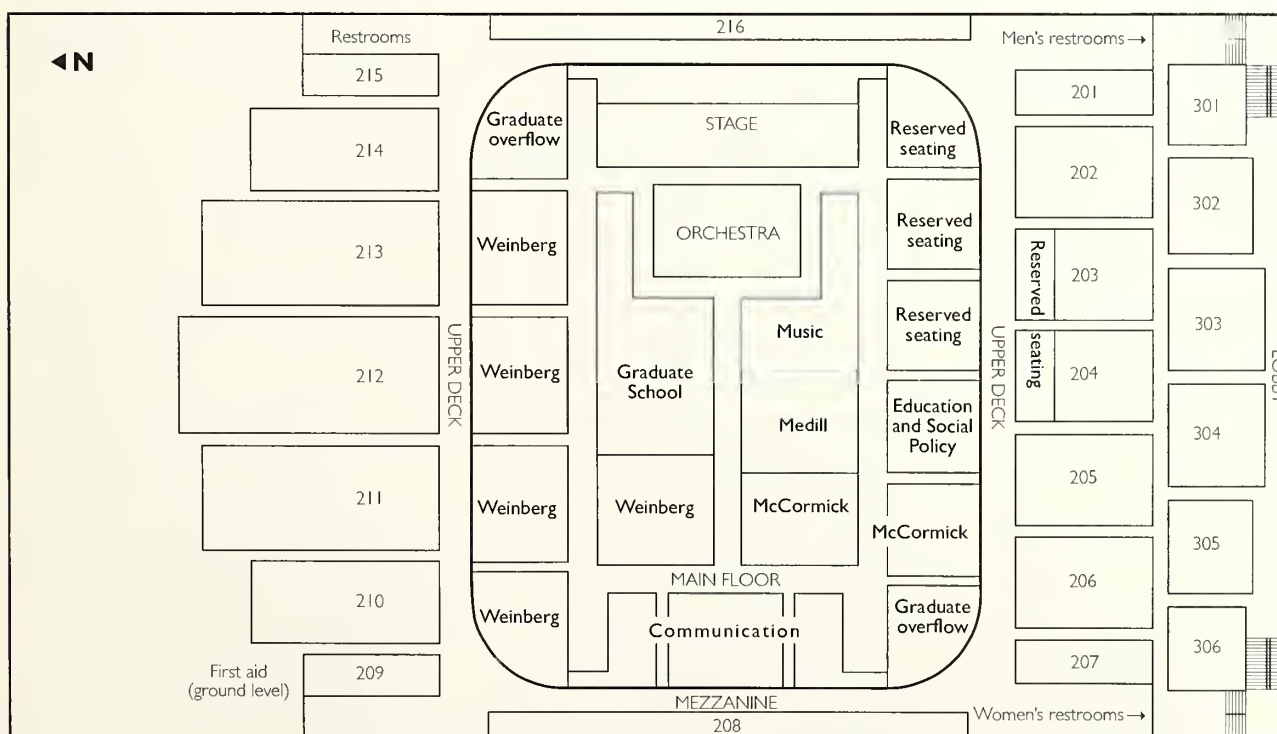

The **School of Music**, established in 1895, offers the degrees of bachelor of music and bachelor of arts in music. In its graduate division, the School of Music offers the degrees of doctor of music and master of music and the certificate in performance.

ACADEMIC PROCESSION AND DRESS

ACADEMIC PROCESSION

The procession begins with the participating schools of the University. Each school group is preceded by its banner. The formation within each school begins with those graduates receiving the highest degree awarded by that school; doctoral candidates are followed by master's candidates, who in turn are followed by bachelor's candidates. Following the graduates are the University faculty, trustees, administrators, and deans. The president's party, led by the senior class Commencement committee, completes the procession.

ACADEMIC DRESS

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from other citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns' trim and sleeve design indicates the level of the degree. The bachelor's gown has pointed sleeves and is worn closed; the master's gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor's gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the

prescribed color of the academic area. The recommended color for gowns is black, although many institutions have adopted colored gowns. Graduates of foreign universities wear gowns of various colors.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The bachelor's hood, which is optional and not worn at Northwestern University, is three feet in length; the master's, three and one-half feet; the doctor's, four feet. The velvet border of the hood is two, three, and five inches wide for the bachelor's, master's, and doctor's degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school's color) and gold. The color of the hood's border — and at Northwestern the color of the cap's tassel as well — indicates the academic area. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem, invocation, and benediction.

At Northwestern University members of the following honor societies may be recognized by the honor cords, medallions, and stoles worn: Alpha Sigma Lambda national honor society, burgundy and gold honor cord; Deru honor society, purple and gold honor cord; Eta Kappa

Nu electrical engineering national honor society, red honor cord; Kappa Theta Epsilon national honor society for cooperative engineering education, maroon and gold honor cord; Mortar Board senior honor society, silver and gold honor cord; Omega Chi Epsilon chemical engineering honor society, maroon honor cord; Pi Sigma Alpha national honor society, brass medallion with red ribbon; Pi Tau Sigma mechanical engineering honor society, blue and rose honor cord; Tau Beta Pi national engineering honor society, white stoles embroidered with the society's symbol in orange; Zeta Phi Eta national professional fraternity in communication arts and sciences, pink and ivory honor cord.

The tassels and borders of the hoods are the following colors:

Judd A. and Marjorie Weinberg College of Arts and Sciences	White
School of Communication	Silver gray
School of Education and Social Policy	Light blue
Robert R. McCormick School of Engineering and Applied Science	Orange

HONORARY DEGREES

WENDY J. CHAMBERLIN

Doctor of Laws

A career member of the U.S. foreign service, Chamberlin served as the U.S. ambassador to Pakistan at the time of the September 11, 2001, terrorist attacks on the United States. In that position she adeptly handled one of the most daunting and sensitive diplomatic assignments in the world. Chamberlin arrived in Islamabad in August 2001 and forged a close working relationship with Pakistani president Musharraf, winning his support for the coalition against terrorism. She had previously served as ambassador to the Lao People's Democratic Republic and deputy chief of mission at the U.S. embassy in Kuala Lumpur. After receiving her bachelor's degree from Northwestern in 1970, Chamberlin earned a master's degree from Boston University. She currently heads the Bureau for Asia and the Near East in the U.S. Agency for International Development, serving as principal adviser to the USAID administrator on development matters relating to 23 countries. Her responsibilities include coordination of the agency's redevelopment efforts in Iraq.

Presented by Lee W. Huebner, professor of communication studies, School of Communication, and professor of journalism, Medill School of Journalism

A varsity swimmer at Northwestern, you have fearlessly navigated the perilous waters of international diplomacy. In a variety of sensitive Asian postings, you won praise for your expertise in managing fast-moving events. As U.S. ambassador to Pakistan during the crucial period following September 11, you earned widespread Arab admiration by choosing to fast during the holy month of Ramadan. After securing Pakistani support in the war against terrorism, you demonstrated your ultimate priorities as a mother by returning home to be with your teenage daughters. Today, as you play a key role in the reconstruction of Iraq, we can be confident that those efforts are in good hands. We thank you for the honor you have brought to your alma mater.

WILLIAM A. COOK

Doctor of Science

Founder and president of the Cook Group, Inc., William A. Cook is a pioneer in the field of manufacturing medical devices. In 1963 he began producing cardiovascular catheters in a spare bedroom of his rented apartment. Under his

leadership the Cook Group has grown into a leading medical-device manufacturing company with 1,800 employees, producing heart catheters, needles, pipettes, and heart pacemakers. A 1953 graduate of Northwestern's Weinberg College of Arts and Sciences, he and his wife have generously supported the life sciences at Northwestern, including their establishment of the Bill and Gayle Cook Chair in the Biological Sciences. Instrumental in the development of downtown Bloomington, Indiana, and the preservation of its historical buildings, Cook has received the Indiana University Chancellor's Medallion Award and the National Preservation Honor Award from the National Trust for Historic Preservation.

Presented by Jonathan Widom, chair and Bill and Gayle Cook Professor of Biochemistry, Molecular Biology, and Cell Biology and professor of chemistry, Judd A. and Marjorie Weinberg College of Arts and Sciences

Fifty years ago, when you earned a bachelor's degree here in biological sciences, few could have guessed that you would produce a drum-and-bugle show on Broadway, drive a tour bus for rocker John Mellencamp, or own a British pro basketball team. You have done all that and more, succeeding through hard work, an unconventional management style, and a talent for innovation. As founder and leader of a thriving medical-device manufacturing firm, you have generously drawn on your success to give back to your community and your alma mater. The life sciences building at Northwestern appropriately bears the names of you and your wife, Gayle. We are proud to add to that honor as we join in celebrating your 50th class reunion.

MILDRED S. DRESSSELHAUS

Doctor of Science

Institute Professor of the Massachusetts Institute of Technology, Dresselhaus is a leader in the field of carbon physics. Among the first scientists to use lasers for magneto-optics experiments, she has revealed graphite's electronic band structure and broken new ground in intercalation physics. Over the past decade she has focused on carbon nanotubes, a burgeoning field with myriad applications. Dresselhaus has authored or coauthored nearly a thousand scientific papers, articles, and reviews. She has served as director of the Department of Energy's Office of Science and president of the American Physical Society

and the American Association for the Advancement of Science; currently she chairs the governing board of the American Institute of Physics. Recipient of the National Medal of Science in 1990, she is a fellow of the American Academy of Arts and Sciences and a member of the National Academy of Sciences and the National Academy of Engineering.

Presented by Katherine T. Faber, chair and professor of materials science and engineering, Robert R. McCormick School of Engineering and Applied Science

You exemplify the very best a scientist can achieve: pioneering research and dedicated public service. As a leader in carbon science, you discovered how electrons are organized in graphite. Your pathfinding work has involved lasers in magneto-optics, transfer of heat and electricity through semimetals, and intercalation physics. In 1992 you and two colleagues developed a hypothesis about carbon nanotubes six years before it was proven true by experiment; potential applications in this area include flat-panel displays, hydrogen energy storage, building construction, and drug delivery. In giving back to your nation and profession, you have chaired and served on countless committees and have held major leadership positions in professional organizations and government. We are proud to welcome you to the Northwestern community.

EARL LAVON FREEMAN

Doctor of Fine Arts

Von Freeman is widely regarded as one of today's most accomplished and innovative jazz tenor saxophonists. Critically acclaimed for his technical brilliance, harmonic sophistication, and improvisatory freedom, he is a founder of the influential "Chicago School" of jazz musicians. His many recordings have won him international recognition and have brought new renown to Chicago jazz. For more than three decades Freeman has led weekly jam sessions at the New Apartment Lounge on Chicago's South Side, where he presides over a unique social space that crosses racial and generational boundaries. Through his exceptional musicianship and generosity, Freeman has been a source of encouragement and inspiration to countless jazz artists. In fall 2002 a celebration at Chicago's Symphony Center recognized his 80th birthday and his contributions to Chicago's standing as a world center for jazz.

Presented by Frederick L. Hemke, Louis and Elsie Snyder Eckstein Professor of Music, School of Music

At age six you broke the horn off your parents' Victrola to create a makeshift saxophone, and you've been making incredible music ever since. While other Chicago talents have sought fame and fortune elsewhere, you stayed in your hometown, believing it more important to become — in your words — “famous within yourself.” Your performances and recordings thrill audiences worldwide, and your weekly South Side jam sessions transcend differences of age, color, and culture through music. Though you may never have taught in a classroom, you are one of the great jazz teachers of our time as mentor to generations of musicians — including Northwestern students at this year's Jazz Fest. For that, and for your gift of music, we offer our warmest applause.

BERNARD LEWIS
Doctor of Humane Letters

Widely recognized as a leading historian and interpreter of the Middle East and its culture, Lewis is Cleveland E. Dodge Professor Emeritus of Near Eastern Studies at Princeton University. With interests ranging from early Islam to contemporary events, Lewis has drawn on his vast historical and linguistic background to write more than 20 books that have been instrumental in molding current understanding of the Middle East. Works such as *The Emergence of Modern Turkey* (1961), *The Muslim Discovery of Europe* (1982), and *Islam in History* (1993) are recognized as seminal studies in the history of this crucial area. Published shortly after the terrorist attacks of September 11, 2001, his recent book *What Went Wrong: Western Impact and Middle Eastern Response* offers a critical analysis of the evolution of Islamic civilization.

Presented by Jacob Lassner, Philip M. and Ethel Klutznick Professor of Jewish Civilization, professor of history and religion, and director of the Crown Family Center for Jewish Studies, Judd A. and Marjorie Weinberg College of Arts and Sciences

You have devoted your career to enlarging our understanding of a much-misunderstood part of the world. Widely sought by policy makers and the media, your insights into Middle Eastern culture are more valuable and

pertinent than ever in the context of today's events. You were among the first to analyze the significance of the Ottoman Empire in shaping the contemporary Arab world, and you have astutely pinpointed the area's restrictions on women as a key reason the Middle East has fallen behind the West. As impressive as the depth of your scholarship is your ability to explain the complexities of Middle Eastern history to the general public and policy officials. We thank you for broadening our view of the world.

ELEANOR E. MACCOBY
Doctor of Science

One of the world's preeminent developmental psychologists, Maccoby serves as Barbara Kimball Browning Professor Emeritus of Psychology at Stanford University. Her research has focused on the development of children's social behavior, particularly as it relates to family functioning, child rearing, and gender differences. In her influential 1974 book *The Psychology of Sex Differences*, she critically examined research on differences — and lack thereof — in intellectual performance and social behaviors between the genders. Recently she has explored the postseparation lives of divorcing families. Often consulted by governmental policy makers, she has played a major role in shaping U.S. public policy regarding children, youth, and families. Maccoby is a past president of the Society for Research in Child Development and a member of the Institute of Medicine, the National Academy of Sciences, and the American Academy of Arts and Sciences.

Presented by P. Lindsay Chase-Lansdale, professor of human development, School of Education and Social Policy, and faculty fellow, Institute for Policy Research

As much as any scholar of our time, you have taught us fundamental truths about children — their socialization process, gender differences, interactions with parents, and response to divorce. Your prolific contributions to the literature of developmental psychology include the book *The Psychology of Sex Differences*, still considered the bible in its field. You have fearlessly promulgated the results of your research even when your findings have run contrary to conventional assumptions, and more often than not, your dissenting perspective has become received wisdom. A respected presence in our nation's

capital, you have enjoyed remarkable success in bringing your research to bear on public policy. We welcome you as a citizen of Northwestern as we salute you for your remarkable achievements.

MATTHEW S. MESELSON
Doctor of Science

Thomas Dudley Cabot Professor of the Natural Sciences at Harvard University, Meselson is a pioneering scholar in the field of molecular genetics and an expert on chemical and biological weapons. His work has studied the nature of DNA reproduction and the mechanisms of molecular evolution. Codirector of the Harvard-Sussex Program on Chemical and Biological Weapons Armament and Arms Litigation, he has campaigned vigorously against chemical and biological weapons programs for nearly 40 years. In recognition of these labors, Meselson was awarded the American Society for Cell Biology's Public Service Award in 2002. He has also received the Eli Lilly Award in Microbiology and Immunology, a MacArthur Fellowship, and the Scientific Freedom and Responsibility Award of the American Association for the Advancement of Science. Meselson is a member of the National Academy of Sciences, the American Academy of Arts and Sciences, and the Royal Society (London).

Presented by Robert A. Holmgren, professor of biochemistry, molecular biology, and cell biology, Judd A. and Marjorie Weinberg College of Arts and Sciences

While still a graduate student, you and a colleague devised a DNA replication test that has been called the most elegant experiment in biology. A pioneer in molecular biology, you helped discover “messenger” RNA and pursued seminal research in the characterization of restriction enzymes, the heat shock response in *Drosophila*, and the nature of molecular evolution. But you have not been content with research alone. As a leader in the campaign to ban chemical and biological weapons, you helped bring about President Nixon's 1969 decision to renounce U.S. development of biological weapons. Your four decades of effort in this area made you an especially valuable resource during the anthrax attacks of 2001. We are proud to add to your many honors.
